

# NETGEAR® ReadyNAS®

## Networking Products for the Education Sector

Market indications point to data doubling every two years. As paper free classes increase the need to be able to store, manage and retrieve data easily must also be met with the right security privileges and access rights.

Affordable, reliable and easy to use, NETGEAR's ReadyNAS and ReadyDATA devices redefine the concept of storage for education. While your students' work and examination grades are stored without the worry of data loss, new cloud options mean children's work can now be accessed in the school or at home.

ReadyNAS and ReadyDATA protects your school with built-in features such as: Unlimited Snapshots captures and restores multiple versions of valuable data. Cloud-based replication makes it easy to move data offsite for protection.

### STORAGE FOR STUDENTS, TEACHERS AND ADMINISTRATION

Affordable, reliable and easy-to-use, ReadyNAS® solutions redefine the concept of storage for education, providing backup, file-sharing and shared storage for physical and virtual machines. Student work and examination grades can be stored without the risk of data loss, and new cloud options enable secure access to work from school or at home.

### COMPLETE DATA PROTECTION FOR YOUR SCHOOL FREE FROM THE COSTS AND CONSTRAINTS OF BIG IT

ReadyDATA is delivered with a full suite of advanced features such as block-level replication, deduplication, and thin provisioning, making them ideal for educational environments that require high performance file-sharing, backup, disaster recovery, or support for virtual infrastructures. ReadyDATA devices can scale and support SAS, SATA, and SSD disk formats - enabling campuses to meet high performance or raw capacity needs.
